CNC Machining – Fabrication Engineering – General Engineering – Plasma and Profile Burning

Pressrelease

Date 17.09.09

Farnworth & Langan achieve ISO 9001:2008 Status

Precision engineering specialists Farnworth and Langan has achieved the internationally recognised quality management accreditation with the help of Burnley College's Employer Training and Development team.

The company, whose main areas of expertise are: CNC Machining, Fabrication Engineering and Plasma and Profile Burning has been awarded the ISO 9001 standard after 12 months of preparation and assessment.

The ISO accreditation ensures that Farnworth and Langan have procedures in place to manage and control resources, in order to ensure consistent product quality, manufactured to required specifications on a time, in order to meet the demand of their customers.

Sue Langan, Operations Support Manager at Farnworth & Langan, said

“The ISO standard will confirm the quality of our products to our existing clients and will be fundamental in developing our customer base.”

“Burnley College's Employer Training and Development team helped us to successfully achieve the accreditation and their knowledge of the ISO standard and how important it was to companies in our industry was invaluable.”

“The accreditation has made a difference to the whole company, with all our employees taking increased responsibility for the quality of their work and savings being made from tightening up our procedures.”

“The continuing requirement for evaluation and assessment of our systems and procedures will ensure that Farnworth & Langan will continue the culture of improvement by leadership and example. In addition the promotion of good housing keeping with a view to maintaining an orderly, tidy and clean working environment will benefit both our customers and us.

Farnworth and Langan's expertise has fundamentally been to provide sub-contract precision engineering services to the tipping gear and earth moving industries, but have, as an acknowledgement of market requirements, been able to diversify into producing varying components for numerous industries, including manufacturers of conveyors, industrial doors, ground maintenance machinery, bar fittings and furniture.

ISO 9001 is the internationally recognised standard for an organisation's internal Quality Management. Benefits of ISO 9001 certification include improved internal working leading to less errors and re-work, improved customer satisfaction and loyalty, improved morale and motivation, competitive advantage and increased profitability.
