Pressrelease

Date 02.08.17

Farnworth & Langan have received Certification of Registration to BS EN 1090.

Following on from achieving and maintaining ISO 9001 status, Farnworth & Langan have been working closely with one of their largest customers, Applied Weighing International Ltd, in order to achieve Certification of Registration to BS EN 1090.

BS EN1090 is a set of European standards that regulate the fabrication and assembly of steel and aluminium structures and are recognized by Construction Products Regulation 2011 (CPR)

Applied Weighing International Ltd offer a complete range of Industrial Weighing Systems and Services. Their reputation for first class service has been built up over many years from their load cell and silo, tank and vessel weighing systems.

Although the current standard is focused on the work and components Farnworth & Langan produce for Applied Weighing International Limited the systems and procedures are designed to ensure development is possible into other area of structural engineering.
